

Gas Filter DATA SHEET ZL-7134

Description

Gas filter is designed to restrain dust particles carried by gases and protect elements at risk (burners, meters and regulators) from rapid blockage. Gas filter composed of a filter cartridge made of washable synthetic material and is completely extractable for full inspection and cleaning.

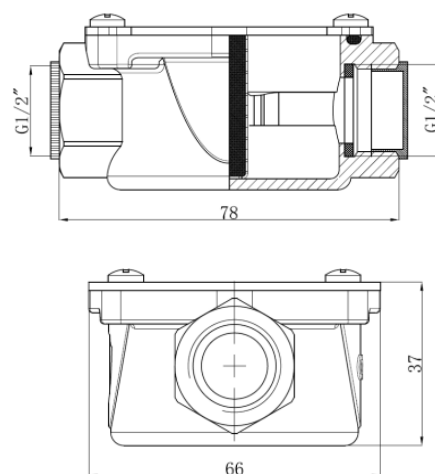

Product features

- Reliable material - all copper material, imported quality
- Effective filtration - to prevent damage or reduce the service life of the wall mounted furnace after combustion of gas impurities after carbonization
- Tight construction - special gas sealing ring for safer use
- Simple maintenance - open the seal cover, take out the filter cotton, clean it and reinstall it. After Installation, check whether the gas leaks before using it
- Economical & practical - effectively extend the service life of wall furnace, reduce maintenance costs

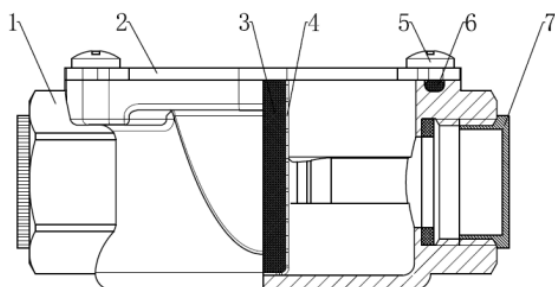

Performance & Dimensions

Code	ZL71341212
------	------------

Applicable medium: Gas, natural gas, hydraulic LPG, air and other non-corrosive gas
Working temperature: -15°C~80°C
Filter fineness: $\Phi \geq 50\mu\text{m}$
Connections: G1/2"FF

Characteristic components

No.	Components	Materials
1	Valve body	Brass
2	Valve cover	Brass
3	Filter Cotton	Filter Cotton
4	Filter	Stainless steel
5	Fixing screws	Stainless steel
6	Seals	NBR
7	Protection cover	PP
